SUMMARY

Passionate self-taught web programmer with a strong foundation in HTML, CSS, and JavaScript. Dedicated to creating user-friendly, dynamic websites. Ready to put my skills into practice and contribute to your team.

SKILLS

- HTML/CSS
- JavaScript
- Bootstrap
- Tailwind
- Git/GitHub
- MongoDB
- Express.js
- React.js
- Node.js

PROJECTS

Weather API

User can retrieve basic weather data for specified location. Uses JavaScript to make HTTP requests to an API and parse JSON data.

Study App

Add problem sets, take quizzes, and use flashcards. Stores data in a JSON file and makes requests to a json-server.

Workout Tracker

Uses React-Router to create a social media workout tracking application.

Yelp Camp

A vanilla JavaScript campsite sharing website based on Yelp.
